ComicCraft – AI Comic Story Creator using Gemini Models

Date	01 October 2026
Team ID	SWTID-2026-8237
Project Name	ComicCraft – AI Comic Story Creator using Gemini Models

PERSONA NAME: Creative User / Aspiring Storyteller

ROLE / USER TYPE: Non-artist, casual user, student, storyteller, or hobbyist who wants to create a personalized comic easily.

THINKS	**SAYS**
• Wants to turn a simple story idea into a complete comic. • Thinks creating comic illustrations manually may require artistic skills and time. • Wants the generated story, dialogue, and images to match the chosen character, setting, tone, and art style.	• I want to create a comic from my own story prompt. • I want to choose the character name, setting, tone, and art style. • I want to preview the comic and download it as a PDF.
FEELS	**DOES**
• Excited to see a simple idea become a visual comic. • Curious about the AI-generated storyline and illustrations. • Satisfied when the final comic is personalized, cohesive, and easy to download.	• Enters a story prompt and other preferences in the web form. • Submits the form and reviews the generated comic panel by panel. • Downloads the completed comic as a PDF after checking the preview.

PROBLEM ADDRESSED: Users may find it difficult and time-consuming to create a complete comic with a storyline, dialogue, illustrations, layout, and PDF export. ComicCraft addresses this by combining Gemini models for story generation with Stable Diffusion for comic-style illustrations and a FastAPI web interface for the complete workflow.

PROJECT CONNECTION: ComicCraft accepts a story prompt, main character name, setting, story tone, and art style, then generates a five-panel comic outline, narration/dialogue, illustrations, preview, and downloadable PDF.
