**Define Problem Statements (Customer Problem Statement Template)**

The customer problem statement for ComicCraft focuses on the difficulty users face when they want to create a complete comic story with narration, dialogue, illustrations, and a downloadable PDF without requiring advanced artistic or technical skills.

| **Problem Statement (PS)** | **I am (Customer)** | **I'm trying to** | **But** | **Because** | **Which makes me feel** | **PS-1** |
|---|---|---|---|---|---|---|
| PS-1 | A user who wants to create a comic story. | Create a personalized comic with a story, dialogues, illustrations, and a PDF. | Creating a complete comic manually requires writing, drawing, designing panels, and arranging the final output. | The user may not have advanced writing, drawing, or design skills, and creating every part separately takes time and effort. | Excited to create a comic, but frustrated by the time and skills required. | |

**Problem Statement for ComicCraft:** Users need an easy way to transform a simple creative idea into a complete comic. ComicCraft addresses this by accepting a story prompt, character name, setting, tone, and art style, then generating a panel-by-panel story, narration, dialogues, comic-style illustrations, and a downloadable PDF.

**Project basis:** The problem statement is prepared from the supplied ComicCraft project documentation and the supplied Customer Problem Statement template.
