Project Demo Planning

Date	01 october 2026
Team ID	SWTID-2026-8237
Project Name	Comic Craft - AI Comic Story Creator using Gemini Models

Maximum Marks: 1 Mark

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce Comic Craft and explain the problem of creating personalized comics manually. Users provide a story prompt, character name, setting, tone, and art style.	2	Member 1
2	Solution Overview	Explain the solution and architecture: HTML/CSS/Jinja2 frontend, Fast API backend, Gemini Flash/Pro for story generation, and Stable Diffusion for illustrations.	2	Member 1
3	Live Feature Demonstration	Demonstrate entering comic details, generating a panel-by-panel story and illustrations, viewing the comic preview, and exporting the completed comic as a PDF.	5	Member 2

4	Q&A Session	Answer questions about the workflow, AI model integration, Fast API routes, image generation, PDF export, and future enhancements.	3	Member 3

Step Activity Notes

Step	Activity	Notes
1	Introduction & Problem Statement	Comic Craft is a web-based application that uses AI to generate personalized comic stories and illustrations from user prompts.
2	Solution Overview	The system uses Fast API for backend routing, Gemini models for structured outlines, narration and dialogue, and Stable Diffusion for comic-style images.
3	Live Feature Demonstration	Show the input form, comic generation workflow, panel-by-panel preview, and the 'Download Your Comic as PDF' feature.
4	Q&A Session	Discuss key features, technical workflow, API routes, deployment, and possible future enhancements such as user profiles and comic libraries.

Project Demo Planning:

A well-structured demo plan ensures that the team presents the ComicCraft project effectively, covering the problem, solution, core AI features, live workflow, and final PDF export in a clear and organized manner.

Demo Flow Summary:

The demonstration begins with the problem statement and an overview of ComicCraft. The team then explains the system architecture and AI integration, followed by a live demonstration of comic generation from user inputs. The demo concludes with PDF export and a Q&A session.
