Customer Journey Map

Date 15 March 2026	01 October 2026
Team ID	SWTID-2026-8237
Project name	Comic craft -AI comic story creator using gemini models
Maximum Marks	2 Marks

Phase of journey	Stage 1 idea &input	Stage 2 generation & preview	Stage 3 Export & completion
Actions What does the customer do?	• Opens Comic Craft homepage • Enters story prompt • Enters main character name • Selects setting, tone and art style • Submits the form	• Waits for AI generation • Reviews generated panels • Reads scene descriptions, captions and narration • Views AI-generated illustrations •Decides whether the result fits the requested style	• Reviews the complete comic • Clicks “Download Your Comic as PDF” •Downloads the generated PDF • Sees export success confirmation • Can create another comic
Touchpoint What part of the service do they interact with?	Comic Craft homepage • index.html input form • Story prompt fields • Generate action	• Fast API backend • Gemini Flash outline generation • Gemini Pro narration/dialogue • Stable Diffusion images • comic_preview.html	• Download button • layout_builder.py • exporters.py / FPDF • export_success.html
Customer Thought What is the customer Thinking?	• “I can describe my comic idea.” • “I can choose the character and visual style.” • “Will the generated story match my idea?”	“The system should turn my prompt into a complete comic.” • “Do the panels connect as one story?” • “Does the art style match my selection?”	• “I want to save and share my comic.” • “Is th• e PDF complete and readable?” • “Can I create another comic easily?”
Customer Feeling What is the customer feeling?	• Curious • Creative • Expect Satisfied •	Excited • Engaged • Evaluative	.Satisfied .Accomplished .Ready to continue

Process Ownership Who is in the lead on this?	User + Fast API frontend The system captures the submitted form data.	Backend + AI services + frontend The backend coordinates outline, story, image generation and layout	Backend export + frontend success page The system builds the PDF and confirms successful export
Opportunities How can we improve this stage?	• Keep the form simple and clear • Provide understandable choices for setting, tone and art style • Give clear feedback after submission	•Maintain consistency between story and image .show generation progress /status .make panel-by-panel review easy .support regeneration for different tone/style	.keep pdf layout professional .confirm successful download clearly .provide easy “create easy “create another comic “navigation .support future comic libraries/multi-page stories

Source basis : The journey follows the documented comic craft flow :uses enter story prompt, character, setting, tone and art style ;the system generates outline, narration/dialogue and illustration; users preview the comic and export it as PDF, The source does not specify actual customer research findings, so thoughts and feelings above are journey -map interpretations of the documented user flow, not survey results
